

envientaTM

OPEN SOURCE EVERYTHING

ENVIENTA is an open source hardware-developing platform helping innovators, creators and makerspaces to connect with supporters and consumers in a decentralized cloud-manufacturing framework. At early stage the project mainly focuses on solutions for sustainable living, home automation, green-energy and food production.

TECH

Key features of the ENVIENTA project

ENVIENTA Platform: The user friendly interface (website/app) managing user accounts and projects from ideas to distributions. The platform connects innovators-creators-supporters-makers-distributors and users, handling all the data flow.

ENVIENTA Innovation Hub: The global network of makerspaces serving the manufacturing need of hardware developing projects.

ENVIENTA Education: The supporting system for sharing the know-hows and developed solutions via online and classroom sessions - a rich environment for learning about the mainstreaming of sustainability and progressing a commons approach in innovation.

The ENV token is the unit behind the protocol fueling transactions in the above framework.

TOKEN

ENV token is a utility token generated on the Ethereum network. (ERC20)

The tokens are not only used as a 0% commission payment within the ENVIENTA ecosystem but manages the dataflow on the platform so it gives opportunity to use it for: **accessing** dApp services, **rewarding** contributors, **reputation** management, project **tracking**, internal **crowdsourcing**.

42.5% of the tokens will be sold to the public. The **ICO starts on 28.08.2018**.

Total token supply: 30.000.000 ENV **Hard cap:** \$18.000.000 **Bonuses:** 30%, 15% (Private and Pre Sale)

TEAM

As a community enterprise ENVIENTA's group varies and is very extensive. We have multi-level decentralized working groups supported by several respectable tutors and advisors. **Gabor Kiss** - chairman, founder, **Gabriel Varaljay** - communication and marketing, co-founder, **Attila Szilagyi** - project manager, Platform, **Laszlo Fazekas** - platform and blockchain developer, **Mate Molnar** - software and multimedia developer, Platform, **Sandor Koszecz** - organisation developer, innovation hubs manager, MakerSpace, **Krisztian Gajdacs** - lead hardware developer, EcoHouse, **Marianna Varbai** - educational program manager, Education **Ferenc Kasa, Dr.** -legal advisor, **Sergey Sevantsyan** - market research manager, **Noemi Huszar** - community and event manager, **Robert Berki** - supply chain manager

TIMELINE

01.11.2014 - Research and development, creating blueprint

15.05.2015 - Founding ENVIENTA organization - Canary Islands (Spain)

01.01.2017 - Rebranding

Q3 2018 - Platform alpha, EcoHouse alpha

01.07.2018 - ICO Private sale

28.08.2018 - ICO Pre-sale

18.09.2018 - ICO crowdsale

Q4 2018 - Platform based production and distribution

Q1 2019 - Platform beta on testnet, first incubator project center

Q2 2019 - iOS and Android mobile app

Q4 2019 - Platform 1.0 on Ethereum network
